To Whom It May Concern:

It is my pleasure to recommend Hollandsworth Construction for their outstanding work on our recent interior renovation project at the Great Expressions Center – Midtown. I served as the Project Manager for this build, which transformed a former café space into a 5,769 SF dental office.

The scope of work included interior finishes and the construction of non-load-bearing walls. The new facility now features a reception area, twelve triage rooms, two surgical suites, a consult room, IT and storage space, two operatories, ADA-compliant restrooms, a doctor's office, a dry lab, a wet/dry lab, and multiple team rooms.

Throughout the project, Hollandsworth Construction demonstrated exceptional professionalism, attention to detail, and commitment to quality. Their team maintained clear communication, coordinated effectively with all parties, and ensured that the project was executed in line with both schedule and design intent.

We are very pleased with the final result and would not hesitate to recommend Hollandsworth Construction for future interior renovation projects. Their expertise and reliability make them an excellent partner for complex healthcare-related construction.

Sincerely,

A handwritten signature in black ink that reads "Greg Penzel". The script is fluid and cursive.
